---

The medium-pressure block is used to secure two adjacent photovoltaic modules and is one of the most critical clamping components in module installation. It is made from high-strength 6005-T5 aluminum ...

Description. The PV Array block implements an array of photovoltaic (PV) modules. The array is built of strings of modules connected in parallel, each string consisting of modules connected in series. This ...

The Medium pressure block products produced by our company have complete specifications, are made by seiko, and have passed the inspection. We ensure the quality of the purchased bolts and ...

It plays the role of installing and fixing panels in solar photovoltaic systems. Solar photovoltaic compacts are divided into "medium pressure blocks" and "edge clamps" and film compacts.

You need to describe project details and conditions of the site, send us the PV layout with detailed requirements for mounting solution, like wind/snow load, tilt angle, ground clearance, foundation type, ...

? function ? : photovoltaic aluminum medium pressure block is mainly used for the connection between two photovoltaic panels to strengthen the stability and wind resistance of the entire photovoltaic power ...

When selecting mid and edge pressure blocks, it's essential to choose the correct type based on the specifications of the PV modules in use, ensuring a perfect fit for a secure fixation.

Hebei Taijiu New Energy Technology Co., Ltd. Rooted in Yongnian - China's fastener hub with seamless logistics, we are a North China-leading high-tech manufacturer, specializing in fasteners ...

Aluminium Mid Clamp (also known as middle clamp) is one of the important solar mounting accessories, which is used for clamping solar panels between two solar modules. It's assembled with bolt and nut ...

## Specifications of the medium pressure block of photovoltaic support

The products are made of aluminum alloy and the surface is anodized. They can be used for 30, 35, 40, 45 and other types of photovoltaic panels. The middle distance of the briquettes is 14-22mm, which ...
