Our patented technology allows unparalleled versatility, enabling PV arrays to be supported at virtually any height over spans of up to 410 feet/125 meters.

Search specific patents by importing a CSV or list of patent publication or application numbers. The utility model discloses a suspended solar power generation device comprising a buoyancy...

Large solar farms in the Sahara Desert could redistribute solar power generation potential locally as well as globally through disturbance of large-scale atmospheric ...

The Skysun Solar Pollinator is designed to be suspended above plants that thrive in partial shade, and it can generate up to two kilowatts of power. The suspended design was validated by Glenn Research ...

This innovation is in line with global energy trends that prioritize clean, renewable sources such as solar energy. Also referred to as solar wing systems or tracking photovoltaic (PV) systems, ...

Today, Skysun builds various suspended solar energy generation systems, ranging from the hammock-like Skysun Solar Pollinator to full-sized solar pergolas that provide both electricity and ...

Learn about the innovative technology of suspended solar panels and how they optimize light absorption for increased energy efficiency.
