Where are solar panels made?

The solar panels are manufactured in our own production facility in Jönköping, which is powered by 100% renewable energy. The solar panels do not contain any heavy glass or aluminium element, significantly reducing materials consumption. In addition, the light-absorbent CIGS layer is extremely thin, contributing to a fast production process.

Why is the solar sector expanding in Sweden?

The solar sector in Sweden is expanding as a result of the country's dedication to renewable energy. This sector is anticipated to be instrumental in the country's transition to a clean energy future. Sweden is increasing its investments in energy storage technologies and solar power capacity in order to achieve carbon neutrality by 2045.

Who makes solar modules?

Solar module factory with 120 MW capacity started by REC Solar in 2003. Since September 2016 owned by Renewable Sun Energy Sweden AB. It's one of the most modern and automated module production facility in Europe. Solar Modules produced at SweModule by Renewable Sun Energy Sweden AB are designed for various markets and applications.

What is the solar market like in Sweden?

The market leans towards specialization, where companies such as SVEA Renewable Solar AB and Exeger Sweden AB focus on specific niches in solar technology. Despite the presence of larger conglomerates like Vattenfall AB, the market is fairly fragmented with numerous smaller companies contributing to its dynamics.
