The Electricity Generating Authority of Thailand (EGAT) has announced plans to develop three pumped storage power plants (PSPPs) at existing dams in Chaiyaphum, Kanchanaburi, and ...

Increasing energy storage capacity will be critical for integrating higher volume of renewables specifically solar in Thailand's power system. In April 2023, Thailand awarded project rights for 1GW of solar ...

The Electricity Generating Authority of Thailand (EGAT) has outlined its decisive path towards achieving carbon neutrality, committing the nation's power sector to a Net Zero Emission ...

Thailand intends to source nearly 35,000 MW of new electricity from renewables as it looks to reach carbon neutrality and net zero commitments. However, the deployment of Battery ...

The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the coming years.

Thailand is rapidly emerging as a leader in Southeast Asia's renewable energy transition, and advanced energy storage systems are at the heart of this transformation. This article explores how cutting-edge ...

"Our report shows Thailand can prioritize deployment of renewables and energy storage to meet growing electricity demand," said Ponglert Chanthorn, BNEF's Thailand and Singapore lead ...

Take a simple step into this future, explore rooftop solar, energy efficiency, or a clean energy career in 2025. The path to a cleaner, steadier energy system is open to everyone.

We believe PDP2024 will be applied by Thai regulator within 2025 and the tariff will remain under pressure by the government to stay at THB3.7-THB4.0/kWh, in line with the tariff trend in PDP2024 ...

Thailand 2025 Energy Storage Power Station

Notably, in Q1 2025, the Electricity Generating Authority of Thailand (EGAT) began construction on the country's largest battery energy storage system (BESS) in Lopburi Province--a 150 MWh project ...
