The partnership aims to develop next-generation hyperscale and AI-ready data center campuses across Thailand to meet surging digital infrastructure demand. Operating under the brand ...

Thailand's upcoming data center capacity is projected to exceed 250 MW on full build, which is nearly double the current capacity in the country. ST Telemedia Global Data Centers is the largest data ...

We support our customers in building customized, reliable, flexible, manageable, and energy-efficient data centers with Power Usage Effectiveness (PUE) lower than 1.5.

Foreign direct investments from Google, AWS, Microsoft, and TikTok are locking in multi-year capacity pipelines that emphasize 42U-to-48U full-cabinet configurations with liquid-cooling ...

To deliver 100kW at current power density levels, the power supply units alone would occupy 6U, leaving very little for the IT systems themselves. But things are moving quickly.

Overall, designing an electrical system for a data center requires careful consideration of the power needs and reliability requirements of the equipment, as well as the safety and regulatory ...

Thailand's strategic position as a digital hub in Southeast Asia has positioned it as a critical market for data center infrastructure development, with rack systems serving as the backbone of modern data ...

Thailand hosts around 40 existing data centers, with cities like Bangkok and Chon buri having a strong presence in the region. SUPERNAP Thailand, True IDC, Etix Everywhere rank among the leading ...

Thailand hosts around 39 existing data centers, with cities like Bangkok and Chon buri having a strong presence in the region. Rayong, Chon Buri, and Bangkok account for more than 40% ...

Thailand Data Center Rack 100kW Turnkey Project

These next-gen data centers boast an astonishing power density of up to 100kW per rack, a significant leap from the traditional 3kW to 20kW in legacy data centers.

To deliver 100kW at current power density levels, the power ...
