This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a stable DC48V power supply and optical distribution.

Elevate performance and security with our Hybrid Energy System and Intelligent Management. Explore modular outdoor base stations for reliable high-capacity operations.

The power of a single base station is not large, and the cost of laying cables alone is very high. Installing a photovoltaic storage system in these places is the fastest and most effective method.

Highjoule HJ-SG-R01 Communication Container Station is used for outdoor large-scale base station sites. Easy to Transport The cabinet is made of lightweight aluminum alloy, allowing for manual ...

It is used in scenarios such as communication base stations, smart cities, transportation, power systems and other edge sites to provide stable power supply and optical distribution networks.

By bringing together various hardware and software components, an EMS provides real-time monitoring, decision-making, and control over the charging and discharging of energy storage assets.

The HJ-SG-R01 is designed to integrate multiple green energy sources such as solar, wind power, and diesel generators. This makes it ideal for remote areas in Australia where grid connectivity is limited.

Huijue Group's energy storage solutions (30 kWh to 30 MWh) cover cost management, backup power, and microgrids.
