-----

Solar technology isn't new. Its history spans from the 7th Century B.C. to today. We started out concentrating the sun's heat with glass and mirrors to light fires. Today, we have everything from ...

Charles Fritts installed the first solar panels on New York City rooftop in 1884. Courtesy of John Perlin. Take a light step back to 1883 when New York inventor Charles Fritts created the first...

Though solar energy has found a dynamic and established role in ...

Discover the fascinating 180-year history of solar panel invention and the broader history of solar energy, from Edmond Becquerel's 1839 discovery to Bell Labs' breakthrough and today's ...

Before the first modern solar panels were invented by Bell Laboratories in 1954, the history of solar energy was one of fits and starts, driven by individual inventors and scientists.

In 1839, French physicist Edmond Becquerel observed that certain materials would produce a small electric current when exposed to light. This phenomenon, known as the photovoltaic ...

From the earliest days of solar-powered satellites to modern rooftop arrays and utility-scale solar farms, this is the complete history of solar energy--and a look at its exciting potential in ...

In 1973, Elliot Berman founded Solar Power Corporation, a subsidiary of Exxon, and made huge strides in the cost of solar cell production. After 1973, oil companies used the extra profits to ...

While experimenting with metal electrodes and an acidic solution, nineteen-year-old French physicist Alexandre Edmond Becquerel creates the first solar cell. This solar cell was known as a photovoltaic ...

In 1839, French physicist Edmond Becquerel observed that certain ...

# The origin of photovoltaic panels

The development of solar cell technology, or photovoltaic (PV) technology, began during the Industrial Revolution when French physicist Alexandre Edmond Becquerellar first demonstrated ...

Though solar energy has found a dynamic and established role in today's clean energy economy, there's a long history behind photovoltaics (PV) that brought the concept of solar energy to ...
