Solar generation rose 23% in 2021, and the industry is expected to continue to grow over the next decade. Women hold 40% of full-time positions in the global solar workforce. Nearly 75% of...

We've gathered over 90 key solar energy statistics to show you exactly what's happening in this fast-growing sector. Our data comes from trusted sources. These include IEA, SEIA, Forbes, ...

We expect the combined share of generation from solar power and wind power to rise from about 18% in 2025 to about 21% in 2027. In our STEO forecast, utility-scale solar is the fastest ...

The previous editions and complete electricity generation and capacity dataset from 2000 onwards are available for download on the Data and Statistics web pages.

Percentage change in solar energy generation relative to the previous year. Data source: Energy Institute - Statistical Review of World Energy (2025) - Learn more about this data. Figures ...

In 2024, net solar power generation in the United States reached its highest point yet at 218.5 terawatt hours of solar thermal and photovoltaic (PV) power. Solar power generation has...

To study America's growing renewable electricity capacity and generation, Climate Central analyzed historical data on solar and wind energy over a 10-year period (2014 to 2023).

The data shows the amount of solar electricity generated is increasing year on year, as more and more people see its benefits as an alternative source of energy.

Solar power is becoming an increasingly popular option for home and business owners due

The proportion of solar power generation in ten years

to its many benefits. With solar panels, you can reduce your energy costs, help the environment, and even make money by selling excess power back to the grid. In this article, we've listed some interesting solar power statistics that will give you a better idea ...See more on theroundup Published: Feb 11, 2022irena Renewable energy statistics 2025 - irena The previous editions and complete electricity generation and capacity dataset from 2000 onwards are available for download on the Data and ...

Although there has been a significant increase of approximately 22% in global solar energy installed capacity between 2021 and 2022, the literature survey reveals that clear gaps still ...

This report uses data from the EIA to analyze solar and wind capacity and generation over the past decade (2014 to 2023) in all 50 states and the District of Columbia.
