---

A field of Tesla megapack batteries. U.S. utility-scale battery storage capacity will reach almost 65 GW by the end of 2026, according to the Energy Information Administration. Provided by ...

Tesla's new Megapack 3 and Megablock solutions promise to revolutionize utility-scale energy storage by boosting capacity to 5 MWh per unit, slashing soft costs, and enabling 1 GWh ...

Solar, wind, and batteries are set to supply virtually all net new US generating capacity in 2026, according to the latest EIA data.

Storage deployment grew across all segments and is forecast to grow another 25% in 2025, according to Wood Mackenzie. Across all segments, including residential, commercial and ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...

145 MW of community-scale, commercial and industrial (CCI) storage was installed in 2024, a 22% increase over the previous year. California, Massachusetts, and New York accounted ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated power in 2024, 8 ...

By 2028, grid-scale energy storage capacity is expected to more than double, reaching 63.7GW, while residential and C& I projects will add 10GW and 2.1GW, respectively.

Battery storage grew substantially in the United States in 2023, with a projected doubling of capacity by 2024. Photo by U.S. government/Rawpixel. Following the record-breaking outcomes of ...
