The Government of Tunisia is taking steps to diversify its energy generation mix by bringing on hydropower and solar energy. As one of the most climate vulnerable Mediterranean countries, ...

solar PV and wind together accounting for nearly 70%. The integration of these variable energy sources into national energy grids will largely depend on storage technologies, and among them especially ...

Tunisia's industry, mines and energy minister Fatima Chiboub signed the deals this week with representatives from Germany's Qair Group, Norway's Scatec, Volterra of France and Aeolus of ...

In the latest round of concessions, the Tunisian government has selected several well-known global companies to develop large wind and solar power projects. Among the key winners is ...

In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy. While STEG continues to resist private investment in the ...

With solar irradiation levels hitting 5.3 kWh/m²/day and wind speeds reaching 9 m/s in coastal areas, this North African nation could power half the Mediterranean - if it can store that energy effectively. Let's ...

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in ...

TuNur is developing a series of renewable energy projects that will produce low-cost green electrons and molecules in Tunisia for export. Each export project consists of three components:

Tunisia has awarded French renewable energy company Volterra a contract to develop a 132-megawatt solar power project to boost electricity supply in the country.

Tunisia s solar power generation and energy storage companies

Generation sites are marked with different sized circles to show sites of 1-9MW, 10-99MW, 100-499MW and 500MW and above. The bottom right of the map lists announced solar ...
