Volt Typhoon, a Chinese-linked APT group, launched a prolonged Energy Grid Cyberattack against a US power utility. Learn about the attack and its implications for critical ...

Recently, Super Typhoon Ragasa made landfall in the Yangjiang area of Guangdong Province, causing severe damage to a photovoltaic power station covering an area of 1,700 mu.

By integrating typhoon monitoring data with PV remote sensing observations, this study systematically evaluates typhoon risks to PV area along China's coastline.

Recently, endless typhoons have put photovoltaic power stations in danger. According to reports, this year's 11th super typhoon "Makar" landed in Wenchang City, Hainan and Xuwen ...

Typhoon Capricorn caused containers to break and collapse away, and cranes to plummet. Mibet's 16 MW floating solar plant withstood and won out. The Category 17 super typhoon ...

China Three Gorges Corp. has nearly completed a 180 MW offshore solar plant, designed for typhoon resistance, off the coast of China.

Jinko Power Technology Co., Ltd., a leading Chinese clean energy supplier and service provider, has announced that the impact of Typhoon Yagi has resulted in certain asset losses at its ...

In this 14 level of typhoon, most of the photovoltaic power stations built by Solartale performed well, and only a few power stations were affected by minor damage.

We present a quantitative assessment method to conduct typhoon-induced PV infrastructure loss assessment. Firstly, we use positive-unlabelled learning random forest (PUL-RF) ...

Explore essential strategies for safeguarding solar power generation facilities against typhoon damage,

Typhoon Solar Power Station

emphasizing proactive inspections and risk mitigation.
