-----

At the exhibition, the company unveiled its all-in-one AC/DC energy storage system for the first time overseas. Featuring compact integration and smart APP controls, it enhances ...

Ultra-large capacity energy storage batteries play a critical role in the integration of renewable energy into existing power grids. They serve as a buffer, storing energy produced during ...

On May 7th, 2025, CATL has unveiled the world's first mass-producible 9MWh ultra-large-capacity energy storage system solution, TENER Stack, setting a new industry benchmark with ...

The world's first 400MWh energy storage project using 628Ah ultra-large cells has been successfully connected to the grid at Phase II of the Ruite New Energy Project in Lingshou, Hebei,...

With a capacity of 9MWh, it can charge 150 electric vehicles or power a German household for six years. The system supports both centralized and string PCS (Power Conversion ...

"To meet the expectation of a BESS system that has high energy density, small footprint, simpler AC-side configuration, and flexible deployment, we bring the latest CATL TENER energy ...

On the first day of the Smarter E show in Munich, CATL, the world's largest battery manufacturer, unveiled the Tener Stack, which it describes as the world's first 9 MWh ultra-large ...

This breakthrough is driven by the continuous technological refinement of battery cells, specifically the development of ultra-large 628Ah cells that improve energy density, reduce lifecycle ...
