We tried brushing some of the paint off the frame and noticed that the overspray is all over, both sides of the shed/panels. Right now, it's been raining/cloudy, so it's hard to fully assess ...

How do I know if my solar panel is damaged? Conducting a meticulous visual inspection of the solar panel. Carefully examine the surface for any visible cracks, shattered glass, or signs of physical impact. It is ...

I tried a dry razor blade and after a summer the paint wasn't coming off. My ...

ChemiTek's PRA breaks down and dissolve the paint stains on your solar panels. Simply dilute the solution with water, apply the solution to the affected area and wait for it to work its magic.

In this blog, we're going to take a look at how you can remove these paint stains without damaging the panels and without spending a lot of money. Before moving forward, let me first discuss briefly why ...

I reached out to NuCamp tech support regarding the clear film and they said the cover should not be peeled off, however the solar panel will still operate and works as it should without this clear cover.

Moisture intrusion is a critical issue arising from peeling. As layers peel away, they create pathways for water to infiltrate the solar panel. This moisture can lead to corrosion of electrical ...

By integrating these panels into buildings and even clothing, solar energy can be seamlessly incorporated into everyday life. While spray-on solar cells hold immense promise, durability remains a ...

When a painter accidentally sprays your solar panels, your solar cannot work optimally until the paint is removed. It's unsightly and dangerous to leave them covered in paint. Using paint thinner or mineral ...

I tried a dry razor blade and after a summer the paint wasn't coming off. My panels might be different but I hit
