We design, build, and support a diverse range of offshore wind turbine foundation installation equipment, from complete installation spreads to specialist tools.

The invention discloses a process for installing an impeller assembly elephant foot balance bracket of an offshore wind power field.

Projects: Foundation Windpower creates an immediate and sustained reduction in energy costs while delivering 100% renewable electricity through long term power purchase agreements.

If you would like to know more about our design technology development of offshore wind power foundation and construction plan of monopile manufacturing plant, please refer to the following ...

With Caterpillar power and Epiroc precision, this team is transforming hard ground into strong foundations for renewable energy.

From two factories--in Saijo City, Ehime Prefecture, and Yokosuka City, Kanagawa Prefecture--it produces foundation structures for both bottom-fixed and floating offshore wind power generation ...

China successfully tested the world's largest 53,800 square feet power-generating kite in Inner Mongolia, advancing its high-altitude wind energy program.

The design and build of these foundations is critical to ensure that the turbines are securely supported and that the combined structure can withstand the forces generated by the wind. A turbine foundation ...

In recent years, offshore wind power generation has been introduced in Japan. In order to further spread this business, it is necessary to improve the design techniques of the foundation structure.

Wind Elephant Power Generation Foundation Excavator

Customers include cement plants, mines, food processors, manufacturers, refrigerated warehouses, data centers, water treatment plants and utilities where Foundation Windpower deploys utility-scale ...
