This Expert Group Report provides recommendations on how to perform studies of wind and solar PV integration.

We have extensive experience in supporting clients through acquisition and divestment of power assets. If your focus is on buy- or sell-side commercial due diligence for wind, solar, storage, or thermal ...

Exponent consults with utilities, developers, and other power plant stakeholders on solar system design, construction, and functionality to the operation and maintenance of wind turbine technology.

In our latest Short-Term Energy Outlook, we forecast that wind and solar energy will lead growth in U.S. power generation for the next two years. As a result of new solar projects coming on ...

Concord New Energy (CNE) delivers world-class renewable energy consulting solutions, supporting the end-to-end development, design, and execution of wind and solar power projects worldwide.

Exponent has led the wind energy consulting industry since the mid-1980s and remains one of the most established and experienced consulting firms providing expertise in the areas of energy generation, ...

To fully optimize the asset, we provide a comprehensive assessment of the photovoltaic or wind power project. We base these assessments on ad hoc performance reports and technical audits.

Few studies have optimized global deployment of photovoltaic and wind power. Here we present a strategy involving construction of 22,821 photovoltaic, onshore-wind, and offshore-wind...

This study focuses on the hybridisation of existing wind power plants with different shares of solar photovoltaic capacity and investigates how these power plants can reduce their combined ...

Wind and photovoltaic power generation consultation

This report calls for strategic government action, enhanced infrastructure, and regulatory reforms to ensure the successful large-scale integration of solar PV and wind in order to meet global ...
