---

The world's largest wind turbine has smashed the record for the most power produced by a single turbine in a day.

Wind turbines generated a new high of 22,711 megawatts on November 11, providing enough power for 22 million homes. From reproductive rights to climate change to Big Tech, The ...

Global wind power generation achieved an unprecedented 1.87 million megawatt-hours on March 12, 2025, according to the 2025 Global Energy Outlook Report. This 18% surge from previous records ...

RenewableUK is highlighting a new wind energy generation record of 22.4 gigawatts (GW) of clean electricity, as confirmed by the National Energy System Operator (NESO). The record ...

Britain's huge network of wind turbines set a monumental new record on November 11 at 7:30 pm. The wind farms collectively generated an unprecedented 22.7 gigawatts (GW) of electricity.

Britain's wind turbines set a new wind generation record, generating an impressive 22.7 gigawatts (GW) at 7:30 pm on November 11. That was enough electricity to power 22 million homes, the National ...

The record-breaking wind turbine features an innovative design that allows it to adjust its blades in real time when winds reach high speeds. This allowed it to continue operating during Typhoon Haikui last ...

Electricity generation from wind established a new record in the United States in April, and wind generation exceeded coal-fired generation in both March and April, data from our July 2024 ...

Britain's wind farms generated a record 22.7 gigawatts of electricity on Tuesday evening last week, enough to power more than 22 million homes. The National Energy System Operator (Neso) said the ...
