In the 12 months to June 2025, wind and solar generated more electricity than hydro, nuclear, and bioenergy for the first time. Just four years earlier, they produced only half as much. This...

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

Discover how the Midong Solar Park is changing the energy market in China with his cutting edge technology. Imagine standing in the middle of a vast desert, surrounded by an endless ...

China Green Development Group has switched on the 3.5 GW Midong solar project in Urumqi, China's Xinjiang region. The project required an investment of CNY 15.45 billion (\$2.13 billion).

Midong features 5.26 million 650-W monocrystalline bifacial double-glass photovoltaic (PV) panels. The facility's infrastructure includes more than 1.23 million supporting piles, five 220-kV...

Solar surged 64% in H1 2025 with 380 GW added worldwide, led by China's record pace, keeping 2025 on track for new highs.

But what if we told you there's a way to triple solar efficiency while cutting costs by 30%? The answer lies in perovskite breakthroughs - the same technology making Xiaoming's solar farm the ...

World's Largest Solar Plant Now Operational in China. China Green Development Group has activated the 3.5 GW Midong solar project in Urumqi, located in the Xinjiang region of China. ...

Solar PV is emerging as one of the most competitive sources of new power generation capacity after a decade of dramatic cost declines. A decline of 74% in total installed costs was observed between ...

China's 3.5 GW Midong solar farm now holds the title for the world's largest, providing a sustainable power

Xiaoming s solar power generation

benchmark and eclipsing previous records.
